Mateo Valero Cortés

Director of the Barcelona Supercomputing Center

Very proud for joining UPC in 1974 and grateful for the possibility of starting a computer architecture department so early. We soon reached international reputation with the talents produced by UPC all along. With UPC support, I founded the Barcelona Supercomputer Centre in 2005. BSC is now the largest supercomputer centre in Europe. Long life to UPC!

Xinping Deng. PhD from UPC in 2016

I'm working in Shenzhen Institutes of Advanced Technology, Chinese Academy of Sciences currently. UPC is a young university but it gets more and more popular over the world. The researchers in TSC (Signal Theory and Communications) are professional and friendly. It was a great pleasure to work with them.

Ariadna Puig Engel, UPC student from 2014 to 2020

Thanks to UPC I have become an Engineer with a wide array of career-building experiences, both in professional and academic settings. I have had the opportunity to work as an intern in industry while studying, travel to China with an international summer program, develop a social project which has been implemented in India, and study at Cranfield University (UK) to obtain a second Master's Degree.
